About Nourish Labs

Opportunity for Clinical Services

Our Mission

nourishlabs

To enable service transformation through digital.

To revolutionise pathways for diagnosis and management of common conditions.

Labs

Our team brings together expertise in product management and digital product co-design, user experience, clinical pathway and service design, artificial intelligence, information governance and security.

Digital Care Pathways

Care Pathway Design and Roll Out

Continuous Evaluation

Secure Cloud Enabled

Care Delivery, Self-Management, Coordination

Digital Care Planning and Recording for Care Providers, Patients and Families

Applying it

Care Settings

With Complex Care Pathways

Integrated Care Pathways

Intensive Care Pathways

Pathways with elements of Self-care, and Community Care

Applying it Now

Care Homes

Risks from not using digital information

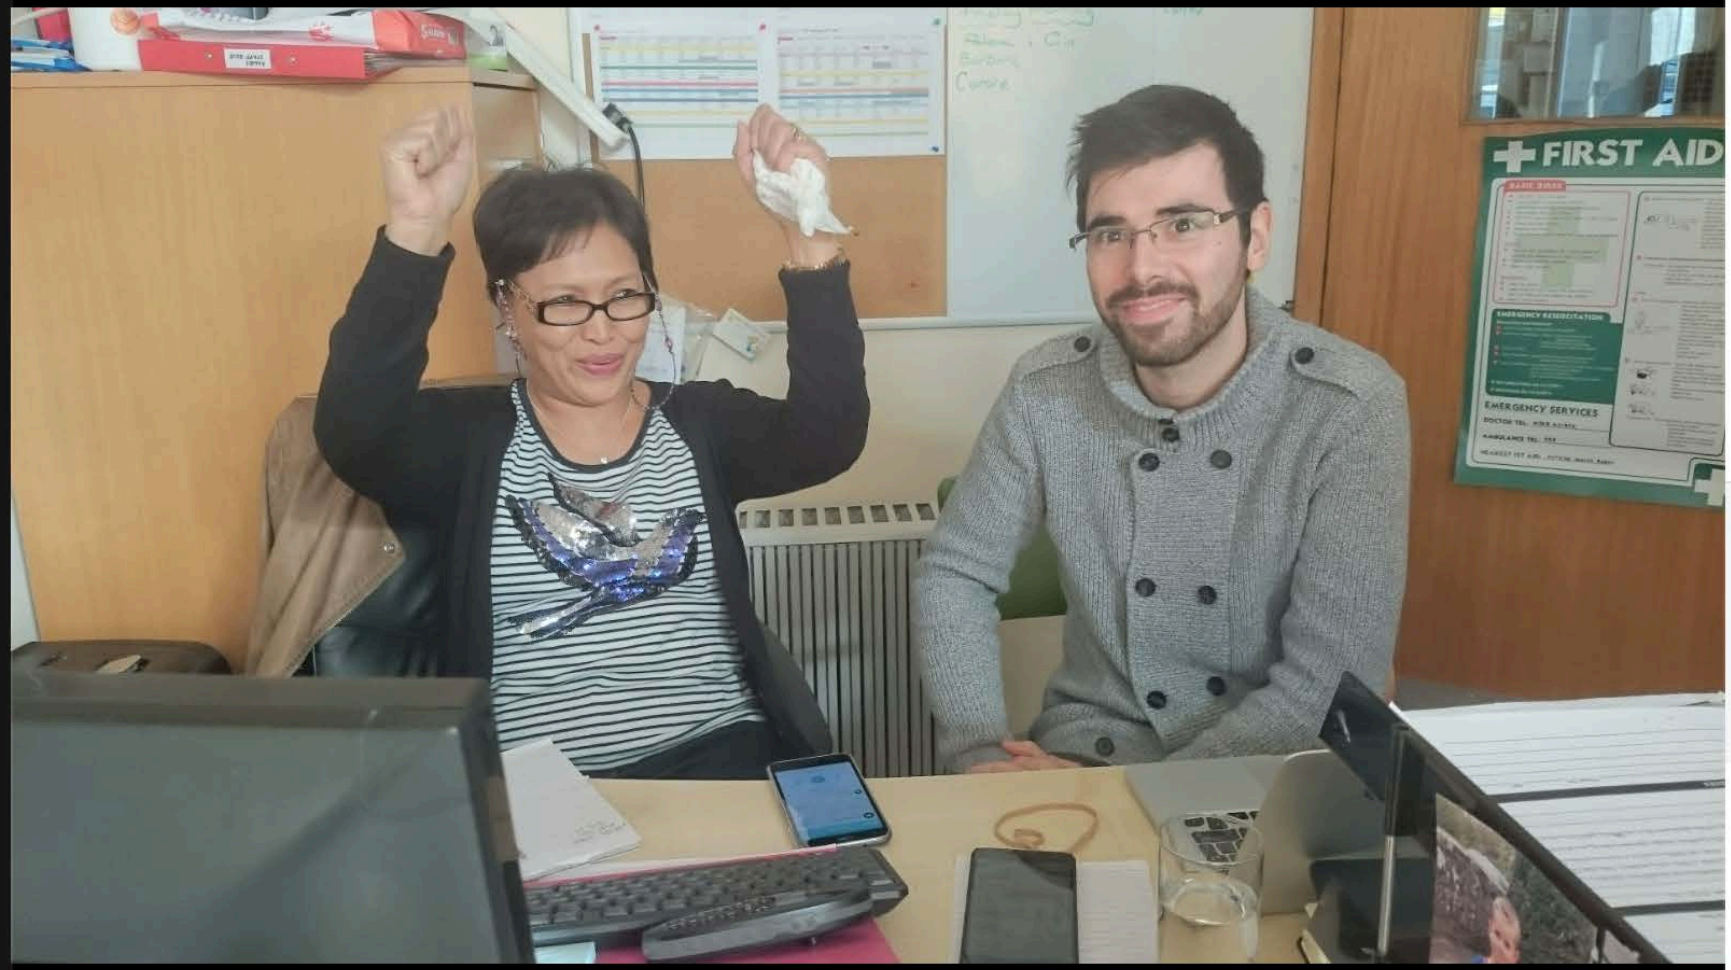
(missed checks, missed tasks, lack of coordination, expensive monitoring)

Overloaded with paperwork

Pressure on A&E and acute admissions

Nourish in Care Homes

Care Plans + Daily Notes + Handovers + Reports



Anna Filsell ▸ **Nourish**

4 hrs ·

A very excited member of the Harbour House team discovers the joys of speech to text facility. This has made Marilou's day. To see her this happy with our new system has made the management team very happy!!

nourish

Carers become purely digital in less than 24 hours

Care homes retain their uniqueness

Substantial savings

nourish

Less errors, better quality assurance

Saving up to 45 minutes per carer per day

Monitoring of clinical risks and key pathways

Significant savings in senior time, archive, stationery

My Talk

About Nourish

Opportunity for Clinical Services

Why is Innovation in Health Difficult?

Clinical Pathways are Complex

- Effective Communication needs Time
- Patient’s Voice is Hard to Integrate

Processes are Focused on Risk Reduction

- IG, Data Security, Consent Management
- Evidence Led Change

Why is Innovation in H[illegible]icult?

Patient Safety Focused
Regulatory Compliance
Budget Pressures
Short Staffed
No Time

Passionate for Change
Curious
Driven to Try New Things
De-constructors

Artificial Intelligence

Clinically led digital care pathways

Enabling clinicians and HCPs to deliver efficient, safe care;

Empowering HCPs and patients;

Digital Primary Care

Digitising pathways and increasing engagement with patients;

Maximising advantages of self-management;

Increasing transparency and risk monitoring;

Potential to re-sell differentiated pathways;

Nourish

Expand into different clinical areas relying on solid clinical knowledge;

Create successful case studies near-to-home, to underpin national and international expansion;

- Primary care triage
- Self-management
- Pre-appointment preparation
- Treatment and follow-up
